

The World's Finest Technology for Data Collection

Since its introduction in 2002, Adaptus™ Imaging Technology has been proof of Hand Held Products' continuous commitment to technology, solutions, and customers. This unwavering commitment to imaging innovation has now led us to the introduction of Adaptus Imaging Technology 5.0 – the next-generation data collection technology that takes all the performance and versatility of previous versions and expands on it, delivering superior value to the end-user.

Better for your customers

Adaptus Imaging Technology 5.0 delivers everything today's most demanding users are looking for in a data collection solution:

- Improved performance further enables service of 1D & 2D applications with one device
- Improved versatility enables service of bar code reading and picture taking with one device
- 5.0 Delivers Superior:
 - Motion Tolerance
 - Depth of Field (DOF)
 - Time to Read (TTR)
 - Resolution
 - Temperature Range
 - Low Light Performance

Making products powered by Adaptus Imaging Technology 5.0 Easy to Use

With all these improvements, the benefit is clear: You and your customers enjoy the added confidence of knowing that Adaptus Imaging Technology is not only the right solution for their needs, but that 5.0 – and future generations – will continue to raise the bar for imaging technology for years to come.

Adaptus Imaging Technology: Product Family Summary

	IT4000 (CURRENT ENGINE)	IT5000VGA (NEW STANDARD)	IT5005MPx (PREMIUM)
Increased Resolution	640 x 480	750 x 480	1280 x 960
Increased Motion Tolerance	~ 2ips	~ 4ips	~ 6 ips
Decreased TTR "ALD" mode	30 fps	> 100 fps	> 100 fps
Low Light Performance	Reduced DOF in low light	No DOF reduction in low light	No DOF reduction in low light
Field of View	~17° half angle	IT4000 + 17%	Same as IT4000
Temperature Range	-10C - +50C	-30C – +50C	-10C – +50C

Worldwide Headquarters

700 Visions Drive, P.O. Box 208
Skaneateles Falls, NY 13153-0208
