

# NCR RealScan™ 7825 Remote Post Display

Keeping  
Your Customers  
Informed

- Meets regulatory requirements
- Available in single or dual display models
- Adjustable, small footprint

Ensure operational compliance with consumer/cashier gross weight display requirements by implementing the NCR RealScan 7825 Remote Post Display. This display provides scale readouts to both your customers and cashiers enabling your customers to checkout with confidence.

## Eliminates Scale Concerns

Your customers expect fair treatment and price integrity. The National Conference on Weights and Measures requires retailers to make scale and weight information available to both customers and cashiers. The NCR RealScan 7825 allows your customers and cashiers to view scale and weight readouts simultaneously, eliminating any questions about price integrity. This provides customers all the information about their purchases upfront, which allows them to pay with ease.

## Improves Readability

The NCR RealScan 7825 is designed to be easy to read and comes in two models - dual and single display. Choose the dual display for maximum readability by both your customers and cashiers. Or select the single display and mount it in a mutually readable position. One or both displays are mounted on a single, small-footprint post and may be swiveled or tilted for better viewing by individual customers and cashiers.

## Physical Specifications

- Height – Dual: 12.3” (31.2 cm)
- Height – Single: 10.6” (26.9cm)
- Weight – Dual: 0.61 lb (277g)
