## Mobile Computer

Dolphin® 9900hc mobile computers are purpose-built for healthcare applications such as bedside point-of-care, specimen collection and inventory management – combining a rugged, user-friendly design with a complete suite of technologies to enable maximum mobile user productivity and efficiency.

Dolphin 9900hc is the first mobile computer available with disinfectant-ready housing. Excellent at resisting the harmful effects of many popular cleaning agents, this device is built to withstand frequent exposure to cleaning solutions commonly used in healthcare environments.

Seamless connectivity between mobile workers and the enterprise is enabled through integrated wireless WAN and LAN communications for high-speed data transfer and cellular voice communication – anytime, anywhere. Bluetooth® connectivity to any compatible wireless device broadens the mobile worker's capabilities in the field.

Adaptus® Imaging Technology 5.0 provides users with the data capture functionality they need to execute the 5 rights of patient safety – whether it is scanning a patient wristband, medication or an employee badge.

Just as important as the technologies the user puts to work, an innovative power management system ensures they get battery-life that lasts a full work-shift, even in wireless, scan-intensive environments.

Rugged, ergonomic and full-featured, the Dolphin 9900hc mobile computer is the right choice where real-time information processing and solution reliability is critical to the operation of a healthcare institution.
