Falcon® 4220

Windows® CE.NET Color Mobile Computer

At A Glance

"The 4220 gives my managers the flexible access to information they need in a durable, cost effective package. This PDA has decreased my annual device owner ship cost by half in the first year of use."

— PSC Retail Customer's CIO

FEATURES	BENEFITS
• Windows® CE .NET v4.2 Operating System	• Powerful computing technologies. • Supports application development using Microsoft eMbedded Visual C++ 4.0, Visual Basic .NET, and Visual C# .NET.
• Intel® PXA255 XScale 400MHz Microprocessor	• Superior mobile computing performance.
• 3.5" 240 x 320 graphic transflective TFT, ¼ VGA, Color Display	• Ultra-Bright color display for excellent readability indoors and outdoors, which results in easier viewing and lower user fatigue.
• Integrated Bar Code Scanner	• Fast scanning performance enables quick and accurate data entry.
• 802.11b Radio Support	• The Falcon 4220 is available with 802.11b Cisco compatible wireless LAN, providing superior wireless networking capabilities.
• Microsoft® Internet Explorer 6.0	• Web browser to support web-enabled applications out-of-the-box. Extend application functionality by using the included Javascript or VBScript support.
• Falcon Management Utility (FMU)	• Manage and configure their deployment of Falcon 4220 terminals. • Manages individual and group-level terminal application, data, and firmware synchronization as well as terminal configuration (scanner, network, and terminal settings). • Included free with every Falcon 4220.
• Falcon Desktop Utility (FDU)	• Manage the user environment on the Falcon 4220 terminal. • Administrators can configure key assignments, Windows Taskbar and Desktop access, Internet Explorer configuration, and list of authorized applications. • Included free with every Falcon 4220.
