NCR RealPOS™ Customer Displays

Enhancing Customer Communication

- Provide Important Transaction Data
- Increase Customer Satisfaction
- Complement Store Decor

NCR's complete line of customer displays enable retailers to ensure their customers have all the necessary information during a transaction. Whether providing basic pricing information or more elaborate graphics through multi-media, NCR RealPOS customer displays are a perfect complement to your total POS solution.

Keeping Customers 'In the Know'

Making it simple for your customers to see pricing, promotions and other items of interest can enhance your communications and customer satisfaction. Full-size LCD displays offer additional real estate, allowing you to include a scrolling receipt with detailed transaction data. A larger display can also feature product advertisements, information on upcoming events and promotions, even an overview of items in an upcoming sale.

Flexibility for Any Environment

NCR RealPOS peripherals are designed for global enterprises. We certify our products to work wherever you plan to expand your business. Where applicable, our offers include weights and measures certifications, Euro and double-byte character support.

In addition to meeting global requirements, NCR RealPOS displays feature flexible configurations that suit almost any

retail environment. Displays can be mounted remotely or integrated into NCR RealPOS 80 and 80c POS workstations. And, to complement your store décor, NCR displays are available in beige or charcoal gray.

Designed for Retail

All NCR RealPOS peripherals are certified with NCR RealPOS workstations to ensure a stable platform and eliminate potential conflicts. In addition, our displays support both OPOS and JavaPOS drivers to simplify application integration and minimize ongoing support costs.
