SAM4S

SAM4POS
for Android™

The SAM4POS application is easily configured for your food, beverage, or retail business and provides the functions and options you need to meet your point of service needs.

▲SAP-6600 (Touch Screen Terminals)

Exceptional POS Capability

Using robust integrated SAM4POS software, your authorized SAM4s dealer can design your custom application by choosing from an array of features available for food and retail operators.

- Casual dining • Hamburger • Bar/Restaurant • Pizza
- Quick service restaurants • Sandwich • Beer/Wine
- Coffee • Taco • Liquor stores • Ice cream and Yogurt
- Deli's • Specialty foods • Specialty gourmet • Bakery
Standard Network Support

SAM4S POS Product can be connected in a fast and reliable Ethernet-style network. Networking supports report data consolidation, ECR programming, plus printer and video requisition routing.
On Screen Manager and Program Access

Access manager and programming functions intuitively through menus and on-screen options. Programming and editing can be done without referring to manuals. Managers can easily view report data and quickly adjust to changing conditions.
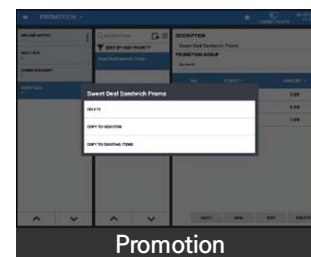

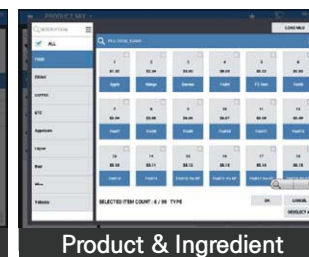

| PLU Programming | Employee | Receipt & Message |
| Promotion | Product & Ingredient | System |

## Database Style Reporting / Report Dashboard Feature

When the Report Mode is selected, a grid of six quick view summary reports displays for managers to quickly see selected report information. We can also choose to view or print all detailed reports by touching the 'REPORT MODE ' selection dropdown. Cash Declaration is also provided in the Report Mode and a calendar view for sales data.
